

CCC Group is a recognized leader in building and servicing a wide range of materials handling systems in a variety of industries.

We have proven abilities in the fields of construction management, structural erection, civil work, mechanical and electrical installation.

We provide the expertise and experience necessary to ensure constructability as we meet client needs and requirements spanning from crucial shut-downs and turn-arounds to complete turnkey projects.

Whether the systems feed raw materials, transport refined products outdoors, or are automated systems moving products through a facility, CCC is the solution provider of choice.

CCC Group excels in every aspect of materials handling system construction.

- Conveyors: belt, roller, drag, screw, deep pan, air, high angle, slat, overland
- Palletizers and depalletizers
- Ancillary structural components: catwalks, mezzanines, conveyor crossovers
- Bucket elevators
- Stackers
- Reclaimers
- Loadout systems: truck, rail, ship, barge
- Storage facilities: silos, warehouses, tanks
- Hoppers: chutes and ducts
- Cross pit spreaders: assembly, disassembly, relocation
- Bucket wheel excavators: assembly, disassembly, relocation
- Mobile transfer conveyors
- Rotary car dumpers
- Crushers
- Vibrating feeders
- Transfers
- Dust collection systems
- Structural steel erection
