VACANCY POWER BI SPECIALIST

CCC Group is an internationally ranked general contractor providing a broad scope of construction, maintenance and fabrication services to various industrial markets throughout the U.S. and in select foreign regions like the Caribbean. We are dedicated to performing work to the highest standards coupled with striving to exceed our clients' expectations to deliver solutions based on our expertise backed by superior safety and quality principles. Through our regional office in Suriname we successfully carry out several construction projects for the local and regional market with the highest management, quality and safety standards. To strengthen our Project Executive Organization, we are currently looking for a suitable candidate.

Job Summary:
Responsible for designing, developing, and maintaining interactive and insightful dashboards and reports using Power BI. Your work will play a crucial role in helping our organization make data-driven decisions, optimize processes, and improve overall performance. Candidate must have demonstrable experience developing Power BI dashboards and be able to demonstrate real-world examples of dashboards developed and any underlying code.

Typical Duties:
- Dashboard Development: Design and create visually appealing and interactive Power BI dashboards that convey data insights effectively.
- Data Extraction: Extract, transform, and load (ETL) data from various sources into Power BI, ensuring data accuracy and consistency.
- Data Modeling: Develop data models, relationships, and calculations within Power BI to support the creation of meaningful visualizations.
- Report Creation: Generate reports, charts, and graphs that provide actionable insights to different business units within the organization.
- Data Integration: Collaborate with the broader team to integrate and consolidate data from different systems and databases.
- User Training: Provide training and support to end-users, ensuring they can effectively use and interpret Power BI dashboards.
- Documentation: Create documentation for dashboards, data sources, and best practices.

Knowledge, Skills, and Competencies:
- Microsoft Power BI Certification
- Experience with Power BI Service, Power Query, and Power Automate.
- Knowledge of data warehousing and data architecture.

Qualifications and other requirements:
- University degree in Engineering or equivalent is preferable.
- Proven experience in developing Power BI dashboards and reports. Must be able to provide portfolio of past work OR complete a sample exercise.
- Fluent in the English language (Speaking, Listening, Reading, Writing) is required;
- 1 to 3 years' experience in construction, estimating or project management is preferable.

Company Benefits:
- Attractive salary and benefits compatible to the local market.
- Opportunity to career growth and development.
