

VACANCY

CCC Group is an internationally ranked general contractor providing a broad scope of construction, maintenance, and fabrication services to various industrial markets throughout the U.S. and in select foreign regions like the Caribbean. We are dedicated to performing work to the highest standards, coupled with striving to exceed our clients' expectations to deliver solutions based on our expertise, backed by superior safety and quality principles. Through our regional office in Suriname, we successfully carry out several construction projects for the local and regional market with the highest management, quality, and safety standards. To strengthen our Project Executive Organization, we are currently looking for a suitable candidate for the following position:

MECHANICAL SUPERINTENDENT

Typical duties

- Lead the review and approval of the schedule and budget control with assistance from Project Controls
- Review and approve contractor forecasts, including summary of construction progress, craft personnel forecasts, and expenditures forecasts
- Review and approve the manpower and equipment required to execute the job
- Provides input for job status reports and approval of subcontractor payment requisitions
- Ensure timely and accurate time writing by Supervisors
- In conjunction with the support services team and supervisors, allocate resources based on the scheduled work plan, reactive work, and clashes in priority
- Manage, coordinate, and implement contract systems (HSE, QA/QC), ensuring governance and compliance across the contract
- Lead, mentor, manage, and support all operational employees such that they are fully conversant with their responsibilities and deliverables on the contract
- Through personal leadership, ensure that employee performance on the contract is aligned to the outcomes of the Contract objectives emanating from the Contract's strategic direction
- Liaise with the QA/QC team to ensure work is performed in accordance with the Contract Quality Management Plan and client specifications

Knowledge, Skills, and Competencies:

- Ability to provide overall supervision of field activities related to construction projects
- Ability to establish and maintain cooperative and ongoing relations among managers, coworkers, subcontractors, and business associates

Qualifications and other requirements:

- Minimum of 5 years of mechanical, process piping, civil/structural experience working with contractors & craft in the field, on Industrial sites
- Prior experience with managing contractors or supervising the field operations
- A mechanical trade qualification from college or technical school
- Supervisory experience of work crews conducting construction and maintenance works
- Strong technical knowledge in tank erection and piping fabrication/installation, installation of components such as skirting and roller frames, and screening media change-outs
- Good planning and organizational skills to meet deadlines

Company Benefits:

- Attractive salary and benefits compatible with the local market;
- Opportunity for career growth and development.
